FIFA 19 introduced a next generation system based on a True Player motion-capture system that processes 13.3 million high-resolution motion capture points, which gives players the most accurate and realistic on-field feedback on pitch. FIFA 20 has made even greater improvements in this area, with the aim to bring this new level of realism to all players. Part of this goal is achieved through “HyperMotion Technology,” which is deployed at True Player High Definition level. Both game engines are now equipped with the same intelligent motion-capture processing system, which is capable of tracking and analyzing everything players see on the pitch to create all the player animations, ball behaviours and effects, as well as telling players how they are performing in real time. Players in FIFA 20 can now take new control of their actions with the new Dribble Manager, which has been upgraded with a new and improved View Control feature. This allows players to control their passing and dribbling as they would in a traditional playmaker role. The Dribble Manager allows players to cycle through three viewing angles to control how they see the pitch, and still receive ball vision before their pass, regardless of the player’s position on the pitch. Players can also direct the flow of play to better suit their game style using the new Real-Time Targeting, which can be toggled using the new L1/R1 buttons. Players can now use this new system to shift the pitch spotlight on or off an opposition player if they’re struggling to track them. The tool is also used to quickly call-in the goalkeeper or target a specific player on the pitch to invite their teammates to join the attack as a team-mate. As players advance through each FIFA Ultimate Team’s full career, they unlock new items, including FIFA Ultimate Team coins, which can be used to purchase new players from packs in FIFA Ultimate Team. These include new graphics options that deliver top-quality results, and new player attributes which enhance the gameplay experience. Using the FIFA 21 Ultimate Team tools, players will have access to players’ attributes including Unique Player Attributes (UPA), Unique Skill Attributes (USAs), Unique Attribute Values (UAVs), Carpet Wall (CW) and more. This will enable players to accurately design their Ultimate Team squad, including accurate custom player names and custom team logos. FIFA 22 introduces the redesigned

What's new in Fifa 22:

- **FIFA 22 introduces a brand-new matchmaking system that makes it easier for you to find opponents who suit your playing style and skill level. Every match you play is preceded by a Pro Scout to guide you to the more competitive modes, and to make sure you find the right opponents for you.**
- **The in-game Visual Media Center (or VMC) brings a new pack of original live games in which you can win money and surprises by completing simple actions. The VMC's new user interface dynamically updates the odds of completing games as you play in them, making it your service for difficult conditions.**
- **New Pro Tactics and Attacking Patterns to help you unlock your perfect move, with Make-Up Goals and Unstoppable Free Kick options. The Pro Experience Cockpit, refined from FIFA 13, is a complete overhaul with improved camera control and natural ball movement.**
- **New waypoints: In addition to the long-established contextual waypoints, smart ways of getting around the field can be triggered on the fly, giving you a dramatic flow of gameplay without breaking the flow of your team. The ability to shift into a micro management mode to carefully gauge and steer your team ensures that you'll always have options at your disposal to master the moment.**
- **New on-ball controls: The ball can now be controlled with two sticks when set up to defend or attack. Seven buttons appear, depending on which way your feet are pointing. Ground passes work in any direction, while through balls pass diagonally. This feature lets you set up a killer through ball to maintain the flow of a game and also shows just how much control we want to give you over the ball.**
- **New AI logic: A new run and run defense paradigm which provides for unpredictable defensive challenges and more skilled, agile positioning across the field.**

The FIFA franchise is one of the most successful sports franchises of all time. With over 400 million players around the globe, FIFA is the world's most popular sports video game series. It is also the most played franchise in history and has been a launch title on consoles worldwide for over 15 years. The FIFA franchise has seen ten iterations so far including the critically acclaimed FIFA '96 and 2000 on the PC. Upcoming releases include FIFA 13 on PS3, PS4, Xbox 360 and Xbox One this September, and FIFA 14 on PS4, Xbox One and PC in October. In 2007, EA SPORTS purchased the EA FIFA license, and their goal is to bring the authentic feeling of global competition to virtual soccer. The awards-winning FIFA series brings out the very best of soccer, from athletes' individual skills and passion to the fluidity and drama of the action on the pitch. History of the FIFA series Following the success of the original DOS based PC game, FIFA '94 (the first on the road to the new millennium) on Playstation, EA Sports continued to develop FIFA on Sony and PC. FIFA '95, included a "Top Player" mode, where fans could single out their very own footballing superstar and play as them. With the introduction of features such as the reticle and free kicks, the game took the next step forward. The attention to detail added to the game's animation, player attributes and graphical presentation, increased the popularity of the game, becoming one of the most played sports games on the world. FIFA '96 was released in 1996, featuring a superb new player model, and was the first game to feature official licences for global leagues. The game was a massive success, going on to sell over 2 million units. FIFA '97, released in 1997, contained improved animations and high quality game sounds, in addition to more game modes and better AI gameplay. In 1998, the 'Ultimate Team' mode and 'Team Management' were added as well as 'Trophies'. With the introduction of the PlayStation Network in 2002, the franchise continued to develop, with FIFA the only title available for console and PC. In 2003, the 'Road to Glory' mode was added, and the first 'FIFA' World Cup in 16 years was held in South Korea and Japan, with FIFA '04 following
